

GEBRAUCHSANWEISUNG

PYROTECHNIK

The product only be used for technical purposes in the context of stage, film and photo productions as well as music and show events. The distribution and the leaving of the product is only permitted in unopened original packaging.

Minimum age according to Directive 2013/29/EU or national regulations. Delivery only to persons with an official permission to use items of category T2.

Use only by persons with specialist knowledge.

Connect only to ignition cables without electricity.

Type of bridging ignitor: U

Bridge resistance: 0,52 - 0,56 Ohm

Cable length 2 m: total resistance 0.92 - 1.16 Ohm

Cable length 5 m: total resistance 1.42 - 1.66 Ohm

Cable material: Copper 0.5 mm - 1.3 mm with insulation

Aer ignition, the product reacts immediately with a loud bang.

Ejection in the direction of the red cover. Make sure that there are no persons or objects in the protection distance.

Protection distance

Product is to be used as described in the manual and in national regulations. Minimum safety distance: to be defined by the user (person with specialist knowledge) with the best available safety measures according to the effect, functional characteristics, specific parameters and enviromental conditions.

A:

B:

T:

Explanation of the parameters:

A = Effect height,

B = Sound level

T= Radial effect range
